📍 Malang, Indonesia

SUMMARY

I am a semester 5 student at Muhammadiyah University of Malang with multiple internship experiences within campus organizations, including holding the position of Head Staff in the Social Media division. I possess excellent skills in data manipulation using SQL and have a keen interest in UI/UX design. My career aspirations are focused on the Back-End field and the industrial sector, particularly in data processing, while also remaining open to other career opportunities.

EXPERIENCE

Social Media Coordinator   12/2022 - Present
Deloper Community University Malang

- I successfully revitalized an inactive organization, reactivating our social media presence with a consistent output of 3 engaging posts per week.
- Organized the 'Bedmood' (Bedah Modul) workshop for semester 1 and 3 students to dissect practical laboratory modules and improve their understanding of programming languages. The workshop received significant student interest and proved highly effective in bridging theory and practice
- Proudly secured the second-place position in the LO-KREATIF UI/UX competition. Our team showcased exceptional UI/UX design skills, crafting a creative and user-friendly solution that impressed judges and participants alike. This achievement highlights our commitment to delivering innovative and user-centric designs.

Volunteer Metaverse Pimnas 35   11/2022 - 11/2022
Metaverse UMM

- Introduced to the vice chancellor of Universitas Gadjah Mada on how to use a virtual machine for the opening of PEMNAS
- During my time as a volunteer, I gained a lot of experience, especially technology about the metaverse that uses Artificial Intelligence (AI)

Graphic Designer   03/2022 - 07/2022
Laboratory Assistant

- I achieved significant progress in organizing, assisting in mobile application development for the campus lab, and creating video content. Despite the original five-month deadline, I successfully completed these tasks within just one month.
- I am organizing a workshop titled "BRAIN TUMOR CLASSIFICATION IN MRI IMAGES USING CNN" featuring a guest speaker from the backend software engineering team at Tokopedia. I am pleased to announce that we have successfully secured sponsorship from four partners for this workshop.

EDUCATION

Software Engineer   10/2021 - Present
University Muhammadiyah Malang - Univerity

- opportunity to join an internship program as a laboratory assistant, which allows me to gain hands-on experience and valuable insights into the practical aspects of working in a laboratory setting. As an assistant.
- Joining a robotics organization got me new experiences. Through hands-on involvement, I have learned new programming languages specifically for robotics and gained valuable insights into cutting-edge technologies.
- Head staff at Develover Community
- 2nd Runner-Up National Student Creativity Competition - LO KREATIF 2022
- Volunteer Metaverse Pimnas 35, introduced to the vice chancellor of Universitas Gadjah Mada on how to use a virtual

machine for the opening of PEMNAS

Science major 07/2018 - 05/2021
SMAN 2 Cepu - Senior High School

- Graduate with good grades (average grade > 85)
- joining computer course (Front-End)
- Joining an English debate organization offers language improvement, critical thinking development, teamwork, networking, and confidence building opportunities.
